EXAMINER'S AMENDMENT and REASONS FOR ALLOWANCE

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Robert Manware (Reg. No. 48,758) on 06-06-05.

The application has been amended as follows:

In the claims:

In claim 1, line 9: insert -- regardless of whether data corresponding to the read request has been delivered from the memory location to the processor controller -- following "read request".

In claim 11, line 4: delete ", and" and insert in its place -- to initiate read request to a memory system; and".

In claim 11, line 7: insert -- when the processor controller is free to process the read request, regardless of whether data corresponding to the read request has been

delivered from the memory system to the processor controller --
following “clock cycle”.

In claim 19, line 6: insert -- when the processor controller is free to process the read request,
regardless of whether data corresponding to the read request has been
delivered from the memory system to the processor controller, --
following “requesting device”.

2. Claims 1-13, 19-23, and 30-34 are allowed.

The following is an examiner's statement of reasons for allowance:

The claims include the limitation of sending a deferred reply from the processor controller to the requesting agent when the processor controller is free to process the read request, regardless of whether data corresponding to the read request has been delivered from the memory system to the processor controller, which is not shown by the prior art of record, in the combination as disclosed and claimed. The examiner interpreted the claims in light of the specification and further in view of Applicant's persuasive argument that “...By initiating the deferred reply upon the availability of the processor controller to process the request, the latent clock cycles associated with the issuance of the deferred reply and defined by the system protocol can be used in transferring the data from memory to the host controller...” (pages 12-13 of the Brief).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
